Total Marks \rightarrow 70 Marks

Assignments → 30 Marks or Test

• Credit Of The Course

4 Credits

B.Sc. SEMESTER -1 MATHEMATICS PAPER 01 (A) - Theory CALCULUS

UNIT 1:

Mean value theorems: **(a)**

Roll's theorem and problems related to it, Lagrange's mean value theorem and problems related to it, Cauchy's mean value theorem and problems related to it.Geometric representation of Roll's theorem, Lagrange's theorem and Cauchy's theorem

(b) Taylor's theorem, expansions and indeterminate forms:

Taylor's theorem (Without proof), Maclaurin's theorem (Without proof), Taylor's and

Maclaurin's infinite series expansions, expansions of e^x , $\sin x$, $\cos x$, $(1+x)^n$,

log(1+x) under proper conditions.

Course is roughly covered by the reference book no (1) chapter 6 and chapter no 8 **Sections 8.1 to 8.5.**

UNIT 2:

(a) Indeterminate Forms:

La' hospital's rules for various indeterminate forms (Without proof). Various

indeterminate forms like $\frac{0}{0}$ form, $\frac{\infty}{\infty}$ form, $0.\infty$ form, $\infty - \infty$ form, 0^{0} form, ∞^{0}

form.

(b) **Differential Equations of First Order and First Degree:**

Definition and method of solving of Differential Equation of the form Variable separable, Homogeneous Differential Equation and Linear differential equations of first order and first degree.

Course is roughly covered by the reference book no (1) chapter 10. Course is roughly covered by the reference book no (3) chapter 11 section 11.1 to 11.4 and section 11.6 and section 11.7.

UNIT 3:

(a) Differential Equations of First Order and First Degree(continue):

Definition and method of solving of **Bernoulli's** differential equation and Definition and methods of solving of **Exact** differential equation.

Differential equations of first order and higher degree:

Differential equations of first order and first degree solvable for x, solvable for y, **(b)** solvable for p. Clairaut's form of differential equation and Lagrange's form of differential equations.

Course is roughly covered by the reference book no (3) chapter 11 section 11.5, 11.8 and 11.9 Chapter 12 section 12.1 to 12.5

Page 2 of 15

[14 MARKS]

[14 MARKS]

[14 MARKS]

<u>UNIT 4</u>:

[14 MARKS]

Linear differential equations of higher order

Linear differential equations of higher order with constant coefficients. Operator D, Meaning of auxiliary equation, Roots of auxiliary equation and solution of auxiliary equation f(D)y = 0 for real roots and complex roots, Operator $^{1}/_{D}$. Solution of differential equations of the type f(D)y = X. Meaning of complimentary function(C.F.) and

Particular integral (P.I.). Methods to obtain Particular integral (P.I.) when $X = e^{ax}$, X =

 $sin(ax+b), X = cos(ax+b), X = x^{m}, X = e^{ax} V$

Course is roughly covered by the reference book no (3) chapter 14 section 14.1 to , 14.91.

<u>UNIT 5</u>:

[14 MARKS]

Linear Differential Equations with Variable Coefficients.

The homogeneous linear equation First method of solution, Second method of solution, method to find complementary function, method to find the particular integral, The

symbolic function $f(\theta)$ and $\frac{1}{f(\theta)}$ Integral corresponding to a term of the form x^{α} in the

second member.

Course is roughly covered by the reference book no (5) chapter 7 section 65 to 69.

Notes:

- There shall be <u>SIX</u> periods of 55 minutes per week for Mathematics- 01 (A)-Theory.
- There shall be one question paper of 70 marks & $2\frac{1}{2}$ hours for Mathematics- 01(A)-

Theory

Format of Question Paper

- There shall be FIVE questions from each unit of 14 marks each.
- Each Question will be of the following form.

(C)Answer any one out of two3 M(D)Answer any one out of two5 M	arks
(C) A new on a put of two 2 M	
	arks
(Short answer type question)	arks

Reference Books :

- (1) Differential Calculus by Shanti Narayan and P K Mittal
- (2) Differential Calculus by Gorakh Prasad
- (3) Integral Calculus by Shanti Narayan
- (4) Integral Calculus by Gorakh Prasad
- (5) Differential Equations by D. A. Murray
- (6) A Text book of Calculus, S. C. Arora and Ramesh Kumar, Pitamber Publishing Company Ltd. Delhi.
- (7) Calculus: Concept and Context, Second edition, By James Stewart Pitamber Publishing Company Ltd. Delhi.
- (8) Calculus, By G. B. Thomas and R. L. Finney, Pearson Education, 2007.

B.Sc. SEMESTER -1 MATHEMATICS PAPER 01 (A) - Theory <u>CALCULUS</u>

OBJECTIVES:

Students will

- understand mean value theorems and indeterminate forms.
- acquire knowledge of linear differential equations.
- solve problems of mean value theorems, indeterminate forms, linear differential equations.

COURSE OUTCOMES:

- prove the mean value theorems.
- solve problem of based on mean value theorem.
- recall Taylor's theorem, Maclaurin's theorem without proof for expansion.
- expand e^x , sinx, cosx, $(1+x)^n$, log(1+x) under proper condition.
- understand and use La' Hospital's rules for various indeterminate forms
- use the definition and method of solving of differential equation of the form Variable
- separable, homogeneous differential equation and Linear differential equations of
- first order and first degree.
- solve differential equations of first order and first degree solvable for x, solvable for y, solvable for p. Clairaut's form of differential equation and Lagrange's form of differential equations.
- solve linear differential equations of higher order with constant coefficients and variable coefficients.

<u>Syllabus of B.Sc. Semester-1</u> <u>According to Choice Based Credit System</u> <u>Effective from June – 2019</u>

(Updated on date:- 06-04-2019 and updation implemented from June - 2019)

• Programme:	B.Sc.
• Semester:	1
• Subject:	Mathematics
• Paper No:	01(B) (Practical)
• Title of Course:	Mathematics Practical
• Total Marks of External Practical Examination:	35 Marks
• Total Marks of Internal Practical Examination:	15 Marks Continuous internal assessment of practical work
• Total Marks of Practical Examination:	External \rightarrow 35 Marks Internal \rightarrow 15 Marks
	Total \rightarrow 50 Marks
• Credit Of The Course	3 Credits

SAURASHTRA UNIVERSITY, RAJKOT. B.Sc. SEMESTER - 1 (CBCS) MATHEMATICS PAPER- 01(B) (Practical) Mathematics Practical

[50 Marks / 3Hours]

Practical No. (1) Draw the graph of $y = \sin x$ or $y = \cos x$ or $y = \tan x$. Practical No. (2) Draw the graph of $y = \sec x$ or $y = \csc x$ or $y = \cot x$. Practical No. (3) Draw the graph of $y = \sin^{-1}x$ or $y = \cos^{-1}x$ or $y = \tan^{-1}x$. Practical No. (4) Draw the graph of $y = \sec^{-1}x$ or $y = \csc^{-1}x$ or $y = \cot^{-1}x$. Practical No. (5) Successive differentiation Find nth derivative of $y = \frac{x}{x^2 + a^2}$ or similar type of example. Practical No. (6) Show that the n^{th} derivative of $y = tan^{-1} x$ is $y_n = (-1)^{n-1} .(n-1)! [sin\{n(\frac{\pi}{2} - y)\} sin^n(\frac{\pi}{2} - y)]$ or similar type of example. Practical No. (7) If $y = \sin mx + \cos mx$ then show that $y_n = m^n \sqrt{1 + (-1)^n \sin 2mx}$ or similar type of example. Practical No. (8) Use reduction formula to evaluate following (1) $\int \sin^6 x dx$, (2) $\int \cos^7 x dx$ and (3) $\int \sin^4 x \cos^4 x dx$ or similar type of example. Practical No. (9) Use reduction formula to evaluate following (1) $\int_{0}^{2a} x^{2} \sqrt{2ax - x^{2}} dx$, (2) $\int_{0}^{\infty} \frac{x^{2}}{(1 + x^{2})^{9/2}} dx$, (3) $\int_{0}^{a} x^{4} (a^{2} - x^{2})^{3/2} dx$ or similar type of example... Practical No. (10) Use reduction formula to evaluate following $(1)\int_{0}^{\infty} \frac{1}{(1+x^2)^3} dx, (2)\int_{0}^{2} \frac{x^4}{\sqrt{4-x^2}} dx, (3)\int_{0}^{\infty} \frac{1}{(a^2+x^2)^4} dx$ or similar type of example.

Notes :

- There shall be **SIX** periods of **1 hour** per week per batch of **15** students.
- 10 practical should be done during semester-1.
- At the time of examination candidate must bring his/her own practical journal duly certified and signed by **H.O.D.**
- There shall be one question paper of **35 Marks** and **3 Hours** for practical examination
- There shall be 15 marks for Internal Practical Examination

 (i.e. Continuous internal assessment of performance of each student during the practical work.)

Format of Question Paper for Practical Examination

Question 1	Answer any THREE out of FIVE	[9+9+9=	27 Marks
Question 2	Journal and Viva:	[8 Marks
Question 3:	Internal Practical Examination	[15 Marks
	TOTAL	[50 Marks

SAURASHTRA UNIVERSITY, RAJKOT. B.Sc. SEMESTER - 1 (CBCS) MATHEMATICS PAPER- 01(B) (Practical)

OBJECTIVES:

Students will

- acquire skills to draw graphs trigonometric functions.
- apply understanding of nth derivative of some functions to solve problems.
- solve problems with punctuality.

COURSE OUTCOMES:

- draw graphs of trigonometric functions.
- find nth derivative of some functions.
- find integral using reduction formulae.

<u>Syllabus of B.Sc. Semester-2</u> <u>According to Choice Based Credit System</u> <u>Effective from June – 2019</u>

(Updated on date:- 06-04-2019 and updation implemented from June - 2019)

B.Sc. • Program: 2 • Semester: **Mathematics** • Subject: **02** (A) - Theory • Paper No: • Title of Course: Geometry, Calculus and Matrix Algebra. (Short Questions) \rightarrow 20 Marks • Marks for External (Descriptive type) \rightarrow 50 Marks Examination: Total Marks \rightarrow 70 Marks Assignments \rightarrow 30 Marks • Marks for Internal or Test Examination: • Credit Of The Course **4** Credits

B.Sc. <u>SEMESTER -2</u> MATHEMATICS PAPER <u>BSMT – 02 (A) Theory</u> <u>GEOMETRY, CALCULUS AND MATRIX ALGEBRA</u>

<u>UNIT 1</u>:

[a] Sphere:

Equation of a sphere in different forms:

Standard form, Central form, Vector form,

General equation of sphere with center (α, β, γ) and radius a. Plane section of a sphere, intersection of two spheres, Sphere with a given diameter, Sphere through a given circle, Intersection of a sphere and a line, Power of a point, Equation of a tangent plane, Equation of normal to the sphere, Condition for the plane lx + my + nz = p touches the sphere $x^2 + y^2 + z^2 + 2ux + 2vy + 2wz + d = 0$.

[b] Cylinder:

Definition of a cylinder, equation of a cylinder with given

Generating parallel to the line $\frac{x}{l} = \frac{y}{m} = \frac{z}{n}$ and guiding curve $ax^2 + 2hxy + by^2 + 2gx + 2fy$

+ c = 0, z = 0. The equation of right circular cylinder with axis $\frac{x-\alpha}{l} = \frac{y-\beta}{m} = \frac{z-\gamma}{n}$ and

radius r.

Course is roughly covered by the reference book no (12) chapter 6 section 6.1 to 6.6 And chapter 7 section 7.7 and 7.7.1 and 7.8.

<u>UNIT 2</u>:

Partial Differentiation: -

Limit and continuity of function of several variables.

Partial derivatives, Partial derivatives of higher order, Partial differentiation of composite function, Homogeneous function, Euler's theorem on homogeneous function of two and three variables, Total differential and chain rule, Change of variables, Partial differentiation of implicit function ,Total differential Young's and Schwartz's theorem (without proof).

Course is roughly covered by the reference book no (1) chapter 11.

<u>UNIT 3</u>:

Applications of Partial Derivatives:

Errors and approximate values, Jacobians, Taylor's theorem of function of two variables, Maxima, Minima, Saddle points of function of several variables, Lagrange's method of undetermined multipliers.

Course is roughly covered by the reference book no (1) chapter 9 .

[14 MARKS]

[14 MARKS]

[14 MARKS]

[14 MARKS]

[a] Concept of a matrix:

Some special matrices, adjoint of a matrix, Non-singular and singular matrices, inverse of a matrix, Symmetric and skew symmetric matrices, Hermitian and skew Hermitian matrices.

[b] Rank of a matrix:

Elementary row and column operations on a matrix, row and column vectors, linear independence of row and column matrices, rank of a matrix, row and column rank of a matrix, equivalence of row and column ranks.

Course is roughly covered by the reference book no (10) chapter 1 section 1.4 to , 1.9, Chapter 4 section 4.1 to 4.3.1.

<u>UNIT 5</u>:

UNIT 4:

[14 MARKS]

Eigen values of a matrix:

Characteristic equation of a matrix, eigen values and eigen vectors of a matrix, Cayley-Hamilton theorem and its use in finding inverse of a matrix. Application of a matrices to solve a system of linear (homogeneous and non-homogeneous both) equations. Theorems on consistency of a system of linear equations.

Course is roughly covered by the reference book no (10) chapter 11 section 11.1 to 11.1.2, Chapter 2 section 2.19.

Notes:

- There shall be <u>SIX</u> periods of 55 minutes per week for Mathematics- 01 (A)-Theory.
- There shall be one question paper of 70 marks & $2\frac{1}{2}$ hours for Mathematics- 01(A)-

Theory

Format of Question Paper

- There shall be FIVE questions from each unit of 14 marks each.
- Each Question will be of the following form.
- Question. Answer any four out of four 4 Marks (A) (Short answer type question) Answer any one out of two **(B)** 2 Marks 3 Marks (\mathbf{C}) Answer any one out of two 5 Marks (D) Answer any one out of two TOTAL **14 MARKS**

Reference Books:

- 1) Differential Calculus by Shanti Narayan. 15th Edition (2004)
- 2) Differential Calculus by Gorakh Prasad
- 3) Integral Calculus by Shanti Narayan
- 4) Differential Equations by D. A. Murray
 - a. A Text book of Calculus, S. C. Arora and Ramesh Kumar, Pitamber Publishingb. Company Ltd. Delhi.
- Calculus: Concept and Context, Second edition, By James Stewart
 a. Pitamber Publishing Company Ltd. Delhi.
- 6) Calculus, By G. B. Thomas and R. L. Finney, Pearson Education, 2007.
- 7) The Elements of Co-ordinate Geometry by S.L. Loney Mac Millan & Co.
- Elementary Treatise on Co-ordinate geometry of three dimensions by R.J.T. Bell Mac Millan & Co.
- 9) A Text book of Analytical Geometry of three dimensions by P.K. Jain & Khalid Ahmad
- 10) A textbook of matrices by Shanti Narayan.
- 11) A Course of Mathematical Analysis by Shanti Narayan
- 12) Analytical Solid Geometry by Shanti Narayan and P.K.Mittal, S.Chand & Co.

B.Sc. <u>SEMESTER -2</u>

MATHEMATICS PAPER <u>BSMT – 02 (A) Theory</u> <u>GEOMETRY, CALCULUS AND MATRIX ALGEBRA</u>

OBJECTIVES:

Students will

- acquire knowledge and understanding of equations of sphere, cylinders.
- apply the knowledge of sphere and cylinders to solve problems.
- acquire knowledge partial differentiation and its applications.
- apply the knowledge of partial differentiation
- acquire knowledge of matrix, rank of matrix, Eigen values of matrix and simultaneous linear equations using theorems.
- apply the knowledge of matrix to solve problems.

COURSE OUTCOMES:

Students will be able to-

- derive equation of sphere in different forms
- solve problems related to sphere, intersection with a line and plane and tangent plane.
- derive equation of cylinder.
- solve problems related to cylinder.
- recall and understand limit and continuity of functions of several variables.

Updated on Date: - 06-04-2019

- recall Young's and Schwartz's theorem without proof.
- understand partial differentiation.
- solve problems related to partial differentiation.
- recall basic concept of matrix.
- find rank and Eigen values of a matrix.
- solve a system of linear (homogeneous and non-homogeneous both) equations
- determine consistency of system of linear equations.

<u>Syllabus of B.Sc. Semester-2</u> <u>According to Choice Based Credit System</u> <u>Effective from June - 2019</u>

SAURASHTRA UNIVERSITY, RAJKOT. B.Sc. SEMESTER -2 (CBCS) MATHEMATICS PAPER- 02 (B) (Practical) Mathematics Practical

[50 Marks / 3Hours]

- Practical No. (1) Draw the graph of $y = e^x$ or $y = 2^x$ or $y = 3^x$.
- Practical No. (2) Draw the graph of $y = \log_e x$ or $y = \log_{10} x$.
- Practical No. (3) Draw the graph of $y = \sinh x$ or $y = \cosh x$.
- Practical No. (4) Draw the graph of $y = \operatorname{sech} x$ or $y = \operatorname{cosech} x$
- Practical No. (5) Draw the graph of $y = \tanh x$ or $y = \coth x$.
- Practical No. (6) Draw the graph of cycloid.
- Practical No. (7) To find inverse of a matrix using Cayley- Hamilton theorem. (At least four examples to be written in journal)
- Practical No. (8) To find inverse of a matrix using Gauss-Elimination Method. (At least four examples to be written in journal)
- Practical No. (9) To solve the system of simultaneous linear algebraic equations using Gauss Elimination Method. (At least four examples to be written in journal)
- Practical No. (10) To solve the given system of simultaneous linear algebraic equations using Gauss-Jordan Method. (At least four examples to be written in journal)

Notes :

- There shall be **SIX** periods of **1 hour** per week per batch of **15** students.
- 10 practical should be done during semester-2.
- At the time of examination candidate must bring his/her own practical journal duly certified and signed by **H.O.D.**
- There shall be one question paper of **35 Marks** and **3 Hours** for practical examination

B.Sc. SEMESTER -3 (CBCS)

(New Syllabus Effective from June - 2020)

MATHEMATICS PAPER-03 (A) Theory

Linear Algebra & Real Analysis

[70 Marks/ $2\frac{1}{2}$ Hours]

[14 MARKS]

<u>Unit 1:</u> <u>Vector space, Linear Dependence, Independence of Vectors</u> and Basis of a Vector space:-

Introduction of Vector space and vectors in , Definition of a Field, Definition of Vector space, Properties of Vector space, Some Standard Vector space, Examples of Vector space, Linear Combination and Span and Subspace, Concept of Linear combination and its examples, Concept of Linear span and its examples, Concept of Subspaces ,Sum and Direct sum of subspaces and their examples, Complementary subspace, Disjoint subspace, Quotient space, Theorem related to subspaces and Linear span, Linearly dependence of vectors, Linearly independence of vectors, Theorem and Examples based on this, Geometrical Representation of Linearly Dependence and Independence of vectors, Basis of a vector space, Co-ordinates of vectors respect to basis, Existence theorem for basis, Invariance of the number of the elements of a basis set, Examples and theorem of basis.

Unit 2: Basis of a Vector space & Dimension of a Vector space:- [14 MARKS]

Basis of a vector space, Co-ordinates of vectors respect to basis, Existence theorem for basis, Invariance of the number of the elements of a basis set, Examples and theorem of basis, Definition of a dimension of Vector space, Existence of Complementary subspace of subspace of finite dimensional vector space, Dimension of sum of subspaces, Example based on dimension, Theorem based on dimension.

UNIT 3: Vector Differentiation

Vector point functions and Scalar point functions, Vector Differentiation, Laplace operator, Laplace equation, Gradient, Divergence and Curl.

UNIT 4: Multiple Integral

Double and triple integrals, Application of double and triple integration as area and volume, Change of variable by Jacobian, Change of variables from Cartesian to polar co-ordinates and triple integration in spherical co-ordinates and cylindrical co-ordinates.

<u>UNIT 5</u>: <u>Vector Integration & Beta & Gamma Functions</u>

Line integral and Green's theorem & its application to simple problems, Surface integral, Volume Integral, Statement of Divergence theorem(Gauss) & its application to simple problems and Statement of Stoke's theorem & its application to simple problems. Beta and Gamma functions and relation between them. Value of

 $e^{-x^2} dx$ as gamma function, Duplication formula. Legendre's Formula(without proof).

SAURASHTRA UNIVERSITY, RAJKOT B.Sc. Semester 3 MATHEMATICS PAPER 03 (A)- Theory Deal Appluric

Real Analysis

OBJECTIVES

Students will

- acquire knowledge of vector space, basis of vector space, vector differentiation & integration and multiple Integral.
- acquire knowledge of Beta, Gamma function and solve their problems.
- understand concept of terminology of vector space and vector calculus.
- solve problems of Sequences and Infinite Series and Vector Calculus.

COURSE OUTCOMES

- recall definitions of vector space, basis of vector space, vector differentiation & integration and multiple Integral.
- understand usage of multiple integration.
- prove some results of vector space and vector differentiation and integration.
- remember definitions and theorems of Vector differentiation and integration.
- understand multiple integration.
- find differentiation and integration of vectors.
- solve problems of multiple integration.
- prove results of beta and gamma function.
- solve problems of beta and gamma function.

Syllabus of B.Sc. Semester-4 According to Choice Based Credit System Linear Algebra, Real Analysis & Differential Geometry (New Syllabus Effective from June - 2020)

• Programme:	B.Sc.	
• Semester:	4	
• Subject:	Mathematics	
• Course code:	04 (A)-Theory

B.Sc. SEMESTER - 4 (CBCS)

(New Syllabus Effective from June - 2020)

MATHEMATICS PAPER- 04 (A)

Linear Algebra, Real Analysis & Differential Geometry Theory

[70 Marks / $2\frac{1}{2}$ Hours]

<u>UNIT 1</u>: Sequences

Definition of a sequence, Bounded sequences, Convergence of a sequence, Limit point of a sequence, Limits Inferior and Superior, Bolzano-Weierstrass Theorem, Convergent sequences, Cauchy's sequence, General principle of convergence of sequence, Algebra of sequences, Subsequence, Monotonic sequences, Some important sequences including $\left\{\sqrt[n]{n}\right\}; \left\{\frac{a_1 + a_2 + ... + a_n}{n}\right\}$

Unit 2: Infinite Series

Series of non-negative terms, Geometric series, p-test, Comparison test, Cauchy's Root test, D'Alembert's Ratio test, Raabe's test, Logarithmic Test, Alternating series. (All the tests without proof).

<u>Unit 3:</u> <u>Linear Transformation</u>:-

Concept of Linear Transformation, Zero and Identity Linear Transformation, Properties of Linear Transformation, Example based on Linear Transformation, Range space of Linear Transformation, Nullity and rank of Linear Transformation, Theorem and Example based on Linear Transformation.

Unit 4 : Representation of Transformations by Matrices:-

Concept of Linear functional, Dual of a vector space, Adjoint of a Linear Transformation, Eigen value and Eigen vectors of Linear Transformation, Eigen basis and Diagonalization of a Linear Transformation.

<u>Unit 5:</u> <u>Curvature, Asymptotes and multiple points:-</u>

Various formulae for curvature(formulae for Cartesian coordinates, parametric equations and Polar coordinates only), Newton's method for curvature at origin, Concavity, Convexity and point of inflexion, Asymptotes parallel to co-ordinate axes, oblique type and algebraic methods, Rules for finding asymptotes. Multiple points, Types of double points.

- 6. Linear Algebra by K.Hoffman and R. Kunza
- 7. A text book of Modern Abstract Algebra by Shanti Narayan, S.Chand & Co., New Delhi
- 8. Basic Linear Algebra with Matlab by S. K. Jain, A. Gunawardena & P.B. Bhattacharya.

B.Sc. Semester 4

Mathematics Paper No. 04 (A)

Linear Algebra, Real Analysis & Differential Geometry

OBJECTIVES

Students will

- acquire knowledge of Linear Algebra, Real Analysis & Differential Geometry.
- solve problems of Linear Algebra, Real Analysis & Differential Geometry.
- COURSE OUTCOMES

- recall definitions of terminology related to sequence and series.
- understand different test of convergence and divergence.
- judge which test of convergence is applicable.
- check convergence of series.
- understand concept of linear transformation and representation transformation by matrices.
- understand theorems of linear theorem.
- prove results based on linear transformation.
- recall concept of curvature, asymptotes and multiple points.
- understand formulae for Cartesian coordinates, parametric equations and Polar coordinates.
- find asymptotes and multiple points.

Syllabus of B.Sc. Semester-3 According to Choice Based Credit System

(New Syllabus Effective from June - 2020)

Programme:	B.Sc.
• Semester:	3
• Subject:	Mathematics
• Course code:	03(B) (Practical)
• Title of Course:	Numerical Methods
 Total Marks of External Practical Examination: 	35 Marks
 Total Marks of Internal Practical Examination: 	15 Marks Continuous internal assessment of practical work
• Total Marks of Practical Examination:	External \rightarrow 35 Marks Internal \rightarrow 15 Marks Total \rightarrow 50 Marks
	1 Vlai 7 30 Iviai KS

3 Credits Credit of the Course

SAURASHTRA UNIVERSITY, RAJKOT SAURASHTRA UNIVERSITY, RAJKOT B.Sc. SEMESTER -3 (CBCS) (New Syllabus Effective from June - 2020)

MATHEMATICS PAPER-03(B) (Practical) Numerical Methods

[50 Marks / 3Hours]

Pr. No. (1)	Solution of algebraic and transcendental equation by
	Graphical method
Pr. No. (2)	Solution of algebraic and transcendental equation by
	Bisection method
Pr. No. (3)	Solution of algebraic and transcendental equation by
	False position method (Regula Falsi Method)
Pr. No. (4)	Find all asymptotes for given curve
Pr. No. (5)	Solution of algebraic and transcendental equation by
	Iteration method
Pr. No. (6)	Solution of algebraic and transcendental equation by Newton-
	Raphson's method
Pr. No. (7)	Applications of Newton-Raphson's method
Pr. No. (8)	Transformation of equation
. ,	Derivatives of a polynomial by synthetic division method
· · ·	Horner's method for solving polynomial equation.
~ /	Journal and viva

Notes :

- There shall be **SIX** periods of **1 hour** per week per batch of **15** students.
- 10 practical should be done during semester-3.
- At the time of examination candidate must bring his/her own practical journal duly certified and signed by **H.O.D.**
- There shall be one question paper of **35 Marks** and **3 Hours** for practical examination
- There shall be 15 marks for Internal Practical Examination

(i.e. Continuous internal assessment of performance of each student during the practical work.)

Format of Question Paper for Practical Examination (For paper 03(B) & paper 04(B))

Question 1	Answer any THREE out of FIVE	[9+9+9=	27 Marks
Question 2	Journal and Viva:	[8 Marks
Question 3:	Internal Practical Examination	[15 Marks
	TOTAL	[50 Marks

B.Sc. Semester 3 Mathematics Paper No. 03 (B) PRACTICAL: NUMERICAL METHODS

OBJECTIVES

Students will

- understand various numerical methods.
- solve problems of numerical methods.
- COURSE OUTCOMES

- solve algebraic and transcendental equation by graphical method.
- solve algebraic and transcendental equation by bisection method.
- solve algebraic and transcendental equation by regula falsi method.
- solve algebraic and transcendental equation by iteration method.
- solve algebraic and transcendental equation by Newton Raphson method.
- solve polynomial equations by Horner's method.
- find all asymptotes for given curve
- derive polynomial by synthetic method.
- transform equation.

Syllabus of B.Sc. Semester-4 According to Choice Based Credit System (New Syllabus Effective from June - 2020)

• Programme:	B.Sc.
• Semester:	4
• Subject:	Mathematics
• Course code:	04(B) (Practical)
• Title of Course:	Introduction to SciLab
• Total Marks of External Practical Examination:	35 Marks
• Total Marks of Internal Practical Examination:	15 Marks (Continuous internal assessment of practical work)
Total Marks of Practical Examina	External \rightarrow 35 Marks tion: Internal \rightarrow 15 Marks
	Total → 50 Marks

Page 13 of 15

SAURASHTRA UNIVERSITY, RAJKOT B. Sc. SEMESTER -4 (CBCS)

(New Syllabus Effective from June - 2020)

MATHEMATICS-PAPER- 04(B) (Practical) [35 Marks / 3Hours] Introduction to SciLab

Practical no.	Objective of Practical	MARKS
1.	(1) To input row vectors and column vectors.(2) To input square and rectangular matrices.	
2.	 To obtain addition, subtraction and Multiplication, division of matrices and multiplication of matrix with scalar. To obtain sub matrices of given matrix and to Delete rows and columns. 	9 Marks
3.	 (1) To find minors, cofactors and adjoint of a matrix. (2) To find inverse of the matrix using adjoint of a matrix (3) To learn commands zeros, ones, eye, rand, det(), inv(), 	
4.	(1) To draw the graph of a circle.(2) To draw the graph of a parabola	
5.	(1) To draw the graph of an ellipse.(2) To draw the graph of a hyperbola.	
6.	(1) To draw graph of $y = sin(x)$ (2) To draw graph of $y = cos(x)$. (3) To draw graph of $y = sec(x)$	
7.	 (1) To draw graph of y = cosec(x). (2) To draw graph of y = tan(x) (3) To draw graph of y = cot(x). 	
8	(1) To draw graph of $y = \sin^{-1}(x)$ (2) To draw graph of $y = \cos^{-1}(x)$. (3) To draw graph of $y = \sec^{-1}(x)$	18 Marks
9.	(1) To draw graph of $y = cosec^{-1}(x)$. (2) To draw graph of $y = tan^{-1}(x)$. (3) To draw graph of $y = cot^{-1}(x)$.	
10	(1) To draw graph of $y = \exp(x)$. (2) To draw graph of $y = \log_e(x)$ (3) To draw graph of $y = \log_{10}(x)$.	
11	 (1) To draw graph of y = cosh(x) (2) To draw graph of y = tanh(x) 	
12	 (1) To draw graph of y = sech(x) (2) To draw graph of y = csch(x). 	
	Journal and Viva	8 Marks
	Total Marks	35 Marks

B.Sc. Semester 4 Mathematics Paper No. 04 (B) PRACTICAL: Introduction to SCILAB

OBJECTIVES

OStudents will

- know the mathematical software SCILAB.
- use SCILAB to solve mathematical problems.
- COURSE OUTCOMES

- input row vectors, column vectors and matrix.
- perform operation of matrices.
- draw graphs of trigonometric functions.
- draw graphs of hyperbolic functions.

Format of Question Paper

- There shall be one question paper of 70 marks & 2 hours 30 minutes for each Mathematics
- Theory Paper.
- There shall be FIVE questions from each unit of 14 marks each.
- Each Question will be of the following form.

Question:	
(A) Answer any four out of four (Short answer type question)	4 Marks
(B) Answer any one out of two	2 Marks
(C) Answer any one out of two	3 Marks
(D) Answer any one out of two	5 Marks
Total	14 Marks

-: Project Work:-

- There will be a project on any topic in Mathematics preferably not covered in the syllabus.
- The project will be assigned in the teams (groups) of at least one and at most five students.
- There will be one lecture per week to guide and motivate for each group of students.
- Topic of the project may be selected based on the following
 - 1. Demand of mathematics required to cater the need of industries and the society as a whole.
 - 2. New topic not taught up to final semester.
 - 3. The topic may be an extension of topic covered in any of the topics/subject taught up to sixth semester.
 - 4. Innovative teaching methodology of Mathematics may also be selected as a topic of the project work.
 - 5. Students may also construct innovative models based on mathematical concepts even those taught at secondary or higher secondary level.
 - 6. Every project or even model must be submitted with proper documentation about the concept and the model.

• During the fifth semester students will be

- 1. Introduced and assigned title of the project,
- 2. Teams will be formed for the same.
- 3. Each group will study, search reference, collect data and work-out details for their topic of project-work.

• During the sixth semester

- 1. Students will finalize, document, submit and get the project work certified in their names.
- 2. The project work must be submitted by the student in the fourteenth week of the sixth semester.
- 3. Only on the submission of project dissertation the student will be issued hall ticket for the end semester theory and practical examination.

- 4. The dissertation may be typed or hand-written and be limited to 40 to 70 pages of A4 size.
- 5. Project work shall be evaluated by an external and one internal examiner which will be followed by presentation of the work and viva-voce.
- 6. Students will be required to undergo verification, evaluation and viva of the projectwork they have done.
- 7. Certified documentation of the project-work done by each group is mandatory. The certified documentation should be produced while appearing for viva and evaluation of project during final examination of sixth semester.
- The project work will be evaluated for 100 marks of which **60% marks** will be allotted for the **dissertation** and **40% for the presentation** and **viva-voce**
- The Evaluation of the project work will be done at the end of the sixth semester. For the Evaluation of the project work there shall be three hours duration. There shall be a batch of 15 students for project and viva.

B.Sc. Semester 5 MATHEMATICS PAPER 05 (A)- Theory Mathematical Analysis-1 & Abstract Algebra - I

OBJECTIVES

Students will

- have knowledge of Abstract algebra.
- understand Riemann Integral, Metric space and group theory.
- solve problems of Riemann Integral, Metric space and group theory.

COURSE OUTCOMES

- remember definitions of Metric space related terminology.
- understand concept of Metric space related terminology.
- recall definitions and theorems of Riemann Integral related terminology.
- prove some results of Riemann Integral.
- solve problem of based on Riemann Integral.
- understand concept of Abstract Algebra.
- remember definitions and theorems of Group Theory.
- understand Subgroups and symmetric group.
- prove some results of Group Theory.
- solve problem of based on Group Theory.
- understand Isomorphism and its properties.

B.Sc. Semester 5 MATHEMATICS PAPER 05 (A)- Theory Mathematical Analysis-1 & Abstract Algebra - I *Effective from June – 2021*

UNIT 1: Metric Spaces:

Marks] Definition and examples of metric space, neighborhood, limit points, interior points, Open and closed sets, Closure, derived set and interior, boundary points. Dense sets, Cantor sets [include Cantor set is closed] but [OMIT: - cantor set is compact and complete.]

UNIT 2: Riemann Integral:

Partitions and Riemann sums, Upper and lower R-integrals, R-integrability, The integral as limit, Some classes of integrable functions, Properties of integrable function, Properties of R-integrable function., Statement of Darboux's theorem (without proof)

UNIT 3:

[a] Riemann Integral

Continuity, Derivability of the integral functions, Fundamental theorem of integral calculus, Mean value theorem of integral calculus.

[b] Abstract Algebra

Definition of Binary Operation , Properties of B.O. & Examples , Group & its Properties, Examples of Group.

UNIT 4: **Subgroups and Symmetric Group** [14 Marks] Subgroup & Its Properties, Cosets & Its Properties, Lagrange's theorem. Permutation, Transposition, Even & Odd Permutation, Symmetric Group, Inverse of Permutation, Alternative Group & Its Universal Property.

UNIT 5: Isomorphism and other properties [14 Marks] Cyclic Group & Cyclic Subgroup & Its Properties, Deduction Of Lagrange's Theorem. Definition of Isomorphism, Equivalence Relation. Cayley Theorem, Automorphism, Properties of isomorphism, Normal subgroup and quotient group.

Text Book for MATHEMATICS PAPER 05 (A) (Theory) Unit – 3[b], 4 and 5 Group Theory

Abstract Algebra

By : Dr. I. H. Sheth, Prentice Hall Of

India. New Delhi.

Course of Mathematics PAPER – 05 Abstract Algebra - I

is covered by following Chapters/ Sections of the above mentioned book namely Abstract Algebra

§ 4.1, § 4.2, § 4.3, § 4.4, §4.5 [OMIT: Example 4.1.11] Chapter 4:

6

[14 Marks]

[14

[14 Marks]

SAURASHTRA UNIVERSITY, RAJKOT

<u>Chapter 6</u>: § 6.1, § 6.2[OMIT: Example 6.2.7], § 6.3,

• [<u>**Omit</u>:- § 6.4], § 6.5</u></u>**

[Omit:- Generalized associative law, Theorem: 6.5.2, Theorem: 6.5.3]

§ 6.6, § 6.7

<u>Chapter 7:</u> § 7.1, § 7.2, § 7.3

<u>Chapter 8:</u> § 8.1, § 8.2, § 8.3 [<u>Omit:</u>- Theorem: 8.2.2]

<u>Chapter 9:</u> § 9.1, § 9.2, § 9.3

<u>Chapter 10:</u> § 10.1, § 10.2

Chapter 11

- <u>Omit :-</u> Chapter 11 Cyclic Groups
- [The whole chapter is to be omitted]

Chapter 12:

• § 12.3, § 12.4 [<u>Omit:</u>- § 12.5]

[Remaining sections of this chapter will be covered in 6^{th} semester]

B.Sc. Semester 5 Mathematics Paper No. 06 (A) Programming in C and Numerical Analysis - I

OBJECTIVES

Students will

- get acquired about a computer language C.
- understand of basic knowledge of Language C.
- acquire knowledge of decision control structure, loop control, user defined function, macro and array.
- apply the knowledge for programming of some mathematical problems.

COURSE OUTCOMES:

- understand history and basic knowledge of Language C.
- understand decision structure, control structure, loops array and macro.
- use the knowledge to write some mathematical programs.

B.Sc. Semester -5 MATHEMATICS PAPER 06 (A) (Theory) Programming in C and Numerical Analysis - I Effective from June – 2021

UNIT 1:

History of C, C character set, Constants, Variables, Keywords, Type Declaration, Type Conversion, Hierarchy of operators, printf & scanf functions, if statement, if-else statements, Nested if-else, Logical operators, Conditional operators, including simple programs relevant to this unit.

UNIT 2:

While loop, for loop, do while loop, break statement, Continue statement goto statement, Introduction to User Defined Functions. [Omit:- switch case statement, Pointers and Recursion] Data types in C Integers: long and short types, signed and unsigned characters, Signed and unsigned float and doubles, including simple programs relevant to this unit.

UNIT 3:

C processors, meaning, Only Macro Expansion, Macros with Arguments, [OMIT:- File inclusion and various directives Conditional Compilation #if and #elif **Directives Miscellaneous Directives #undef Directive #pragma Directive]** Arrays, meaning: one dimensional and two dimensional, only initialization and use in simple programs [OMIT:- no pointers and no three dimensional array, Arrays and functions.], including simple programs relevant to this unit.

UNIT 4:

Simultaneous linear algebraic equation:

Direct methods: Gauss elimination method, Gauss Jordan method, Method of factorization (L.U. Decomposition), Crout's method. Iterative methods: Jacobi's method, Gauss Seidal's method.

Empirical laws and curve fitting.

The linear law, Laws reducible to linear laws, Principle of least square, Fitting a straight

line, a parabola and exponential curve and the curve $y=a^x$

UNIT 5:

Finite differences:

Finite differences(forward, backward and central),

Differences of polynomials, Factorial polynomial, Reciprocal Factorial polynomial, Polynomial factorial notation, Error propagation in difference table, Other difference operators(Shift, averaging, differential and unit) and relation between them.

Interpolation with equal intervals:

Gregory- Newton forward interpolation formula, Gregory- Newton backward interpolation formula, Equidistance terms with one or more missing values.

B.Sc. Semester 5 Mathematics Paper No. 07 (A) Boolean Algebra and Complex Analysis-1

OBJECTIVES:

Students will

- acquire concept of Relation, Boolean algebra, Analytic function, Cauchy integral formula and Fundamental theorem of algebra.
- solve some problems based on them.

COURSE OUTCOMES:

- understand the concept of Relation and solve its problem.
- understand the concept of Boolean algebra and solve its problem.
- understand the concept of Cauchy integral and solve its problem.
- understand the concept of Fundamental theorem of algebra and solve its problem.

B.Sc. Semester 5 Mathematics Paper No. 07 (A) Boolean Algebra and Complex Analysis-1

Effective from June – 2021

UNIT 1:

Relations:

Relations and different types of relations. Binary relations, Equivalence relations and partitions, partial order relations, Posets, Hasse diagram, Lattices as posets, Properties of

lattices, Lattices as algebraic systems, Sub lattices, Direct product of two lattices, Homomorphism, order isomorphism of two posets, Isomorphic lattices, Complete lattices, Distributive lattices, Complemented lattices.

UNIT 2:

Boolean algebra:

Definition, Examples BA, Direct product of two BA, homomorphism, Atoms of BA, Anti atoms, Stone's representation theorem, The set A(x) of all atoms of BA and its properties.

Isomorphism of a finite of finite BA and $(P(A), \subseteq)$, Boolean functions expressions, Minterms, Maxterms, Representation of a B. expression as a sum of product Canonical form. Karnaugh map. Minimization of a B. expression by cube array representation and by Karnaugh map.

UNIT 3:

Analytic functions:

Functions of complex variables, limits, Theorems on limits, Continuity and differentiability, of complex functions, harmonic functions, Entire functions and analytic functions.

UNIT 4:

Cauchy'sintegral formula:

Cauchy Riemann conditions in Cartesian and polar form. Definite integral contours, line integrals Cauchy-Goursat theorem(**without proof**), Cauchy's integral formula.

UNIT 5:

Fundamental theorem of algebra:

Higher order derivative of analytic function, Morera's theorem, Cauchy's inequality and Liouville's theorem, Fundamental theorem of algebra, Maximum modulus theorem.

SAURASHTRA UNIVERSITY, RAJKOT

B.Sc. Semester 5 Mathematics Paper No. 05 (B) PRACTICAL: Programming with SCILAB

OBJECTIVES

Students will

- acquire knowledge about mathematical software Scilab.
- understand commands and tools of the software
- COURSE OUTCOMES

- use the software for matrix related operations.
- solve simultaneous equations using various methods.
- draw graphs of cycloid, catenaries and spiral.

B.Sc. Semester 5 Mathematics Paper No. 05 (B) PRACTICAL: Programming with SCILAB *Effective from June – 2021*

- Total Marks:- 35 Marks (External)+ <u>15 Marks</u> (Internal)= 50 Marks / 3 hours
 - 1) To find the inverse of a matrix using **GAUSS-ELIMINATION** method..
 - 2) To find inverse of given matrix using **GAUSS-JORDAN** method
 - 3) To find **Eigen values** and **Eigen vectors** of given matrix
 - 4) To find inverse of given matrix using **CAYLEY-HAMILTON** theorem
 - 5) To solve given system of simultaneous linear algebraic equations using GAUSS- JORDAN method.
 - 6) To solve given system of simultaneous linear algebraic equations using **GAUSS- JACOBI** method.
 - To solve given system of simultaneous linear algebraic equations using GAUSS- SEIDAL'S method.
 - 8) To draw graphs of **Cycloid**
 - 9) To draw graphs of **Catenaries**
 - 10) To draw graphs of **spiral** $\mathbf{r} = \exp(-\mathbf{theta}/\mathbf{10})$.

Notes :

- There shall be **SIX** periods of **1 hour** per week per batch of **15** students.
- 10 practical should be done during semester-5.
- At the time of examination candidate must bring his/her own practical journal duly certified and signed by **H.O.D.**
- There shall be one question paper of 35 Marks and 3 Hours for practical examination
- There shall be **15 marks** for Internal Practical Examination

(i.e. Continuous internal assessment of performance of each student during the practical work.)

Format of Ouestion Paper for Practical Examination

Question 1	Answer any THREE out of FIVE	[9+9+9=	27 Marks
Question 2	Journal and Viva:	[8 Marks
Question 3:	Internal Practical Examination	[15 Marks
	TOTAL	[50 Marks

B.Sc. Semester 5 Mathematics Paper No. 06 (B) PRACTICAL: Programming in C Language

OBJECTIVES

Students will

- use theoretical knowledge of language C in programming.
- acquire skill of programming with punctuality.

COURSE OUTCOMES:

- understand how to write programs.
- write program using decision control structure.
- write program using loop control structure.
- write program using user defined functions.
- write program using arrays.
- write program using macro.

B.Sc. Semester 5 Mathematics Paper No. 06 (B) PRACTICAL: Programming in C Language Effective from June – 2021

• Total Marks:- 35 Marks (External)+ <u>15 Marks</u> (Internal) = 50 Marks / 3 hours

- (1) To write a program to find net salary of the employee.
- (2) To write a program to solve the quadratic equation,
- (3) To write a program to reverse a number,
- (4) To write a program to verify a number whether it is palindrome or not.
- (5) To write a program to find sum of the digits,
- (6) To write a program to print Armstrong numbers,
- (7) To write a program to find compound interest for given years,
- (8) To write a program to find nPr and nCr.
- (9) To write a program to find number of odd number and even numbers.
- (10) To write a program to generate arithmetic and geometric progressions.
- (11) To write a program to find prime number between two numbers,
- (12) To write a program to solve the equation by Bisection method or
- (13) To write a program to solve the equation by N-R method.
- (14) To write a program to add and multiply two matrices.

Notes :

- There shall be **SIX** periods of **1 hour** per week per batch of **15** students.
- 10 practical should be done during semester-5.
- At the time of examination candidate must bring his/her own practical journal duly certified and signed by **H.O.D.**
- There shall be one question paper of **35 Marks** and **3 Hours** for practical examination
- There shall be **15 marks** for Internal Practical Examination

(i.e. Continuous internal assessment of performance of each student during the practical work.) **Format of Ouestion Paper for Practical Examination**

Question 1	Answer any THREE out of FIVE	[9+9+9=	27 Marks
Question 2	Journal and Viva:	[8 Marks
Question 3:	Internal Practical Examination	[15 Marks
	TOTAL [50 Ma	rks

SAURASHTRA UNIVERSITY, RAJKOT

B.Sc. Semester 5 Mathematics Paper No. 07 (B) PRACTICAL: Numerical Analysis-1 *Effective from June – 2021*

OBJECTIVES

Students will

- use theoretical knowledge of Numerical Analysis-1.
- acquire skill of programming with punctuality.

COURSE OUTCOMES

- understand fitting of curves.
- fit a straight line and parabola to given data.
- solve simultaneous equations using Gauss elimination, Gauss Jordan method, Jacobi's method and Gauss Seidel's method
- understand finite differences.
- solve problems using Gregory-Newton's forward interpolation formula, Gregory-Newton's backward interpolation formula and Equidistance terms with one or more missing values.

B.Sc. Semester 5 Mathematics Paper No. 07 (B) PRACTICAL: Numerical Analysis-1 *Effective from June – 2021*

- Total Marks:- 35 Marks (External) + <u>15 Marks</u> (Internal) = 50 Marks / 3 hours
 - 1) Fitting (1) a straight line and (2) $y = e^{ax}$
 - 2) Fitting (1) a parabola and (2) $y = ax^{b}$
 - 3) Gauss elimination
 - 4) Gauss Jordan method
 - 5) Jacobi's method
 - 6) Gauss Seidel's method
 - 7) Finite differences.
 - 8) Gregory-Newton's forward interpolation formula.
 - 9) Gregory-Newton's backward interpolation formula.
 - 10) Equidistance terms with one or more missing values

Note:

- There shall be **SIX** periods of **1 hour** per week per batch of **15** students.
- 10 practical should be done during semester-5.
- At the time of examination candidate must bring his/her own practical journal duly certified and signed by **H.O.D.**
- There shall be one question paper of 35 Marks and 3 Hours for practical examination
- There shall be **15 marks** for Internal Practical Examination

(i.e. Continuous internal assessment of performance of each student during the practical work.)

Format of Ouestion Paper for Practical Examination

	TOTAL	[50 Marks
Question 3:	Internal Practical Examination	[15 Marks
Question 2	Journal and Viva:	[8 Marks
Question 1	Answer any THREE out of FIVE	[9+9+9=	27 Marks

Syllabus B.Sc. Semester-6 According to Choice Based Credit System *Effective from June – 2021*

(Updated on date:- 01-01-2020 and updation implemented from June - 2021)

Program:	B.Sc.
• Semester:	6
• Subject:	Mathematics
• Course codes:	08 (A) -Theory
	09 (A) - Theory
	10 (A) - Theory
	08 (B) - Practical
	09 (B) - Practical
	10 (B) - Practical
	1 Project
• Total Credit Of The	
Semester	30 Credit

B. Sc. MATHEMATICS SEMESTER : VI

• The Course Design of B. Sc. Sem.- VI (Mathematics) according to choice based credit system (CBCS) comprising of Paper Number, Name, No. of theory lectures per week, No. of practical lectures per week , total marks of the course are as follows :

SR.NO	SUBJECT	NO. OF THEORY LECTURE PER WEEK	NO. OF PRACTICAL LECTURE PER	TOTAL MARKS	Credit Of Each Paper.
1	PAPER 08 (A) (Theory) Graph Theory & Complex Analysis-II	6	-	70(External)+ 30 (Internal) = 100 Marks	6
2	PAPER 09 (A) (Theory) Mathematical Analysis-II & Abstract Algebra-II	6	-	70(External)+ 30 (Internal) = 100 Marks	6
3	PAPER 10 (A) (Theory) Optimization & Numerical Analysis-II	6	-	70(External)+ 30 (Internal) = 100 Marks	6
4	PAPER 08 (B) (Practical) Introduction to GeoGebra	-	6	35(External)+ 15(Internal) = 50 Marks	3
5	PAPER 09 (B) (Practical) Numerical Analysis-II	-	6	35(External)+ 15(Internal) = 50 Marks	3
6	PAPER 10 (B) (Practical) Optimization	-	6	35(External)+ 15(Internal) = 50 Marks	3
7	Project Work & Viva	1 Guidance Lect. For a group of 2 to 5 students / week	Project work to be finalized and certified and evaluated.	60Marks (Dissertation) + 40 Marks (Viva) = 100 Marks	3
			Total credi	t of the semester	30

Marks Distribution of Each Paper for Theory and Practical (for SEMESTER-VI)

THEORY		
Total Marks of Each Theory	70 Marks	
Paper [External Examination]		
Total Marks of Each Theory	10 Marks	Internal Exam
Paper [Internal Examination]	10 Marks	Assignment
	05 Marks	Quiz
	05 Marks	Attendance
	30 Marks	
Total	100 Marks	
PRACTICAL		
Total Marks of Each Practical	35 Marks	
Paper [External Examination]		
Total Marks of Each Practical	15 Marks	[Continuous internal assessment of
Paper		practical work]
Total	50 Marks	

Format of Question Paper

- There shall be one question paper of 70 marks & $2\frac{1}{2}$ hours for each Mathematics Theory Paper.
- There shall be FIVE questions from each unit of 14 marks each.
- Each Question will be of the following form.

Question

(A)	Answer any four out of four	4 Marks
	(Short answer type question)	
(B)	Answer any one out of two	2 Marks
(C)	Answer any one out of two	3 Marks
(D)	Answer any one out of two	5 Marks
. ,	•	

TOTAL 14 MARKS

B.Sc. Semester 6 MATHEMATICS Paper No. 08 (A) Graph Theory & Complex Analysis-II

OBJECTIVES

Students will

- have knowledge of Graph Theory.
- have knowledge of Complex Analysis-2.
- understand Graph theory and Complex analysis-2
- solve problems of graph theory and complex analysis-2.

COURSE OUTCOMES

- remember definitions and result of graph theory.
- understand theorems of graph theory.
- prove some results of graph theory.
- solve problem of based on graph theory.
- understand concept of complex analysis-2.
- remember definitions and theorems of complex analysis.
- understand proof of theorems.
- solve problem of based on theorems.

B.Sc. Semester 6 MATHEMATICS Paper No. 08 (A) Graph Theory & Complex Analysis-II Effective from June – 2021

UNIT 1:

Graph theory:

Basic definitions and simple examples, Directed, Undirected, multi-graph, mixed graph. Incidence relation and degree of the graph. Empty, complete, regular graphs. Sub graph, connected and disconnected graphs.

Walk and unilateral components, Euler graphs, Unicursal graph, Operation of graph circuit & tree. Hamiltonian path and cycles, tree, Binary and Spanning trees.

UNIT 2:

Cut-set, connectivity and separability

[OMIT:-1-isomorphism, 2-isomorphism]

planner graphs and their different representation, Dual of a planner graph, Euler's formula, Kuratowski's first and second non-planner graph, vector space associated with a graph, Circuit subspace and cut sets subspace, Orthogonal space.

Vertex coloring, Chromatic number, Index number and partition, Cyclic graph and demyelization of cyclic graphs, Matrix representation of a graph, Adjacency matrix, Incidence matrix, Path matrix,

[OMIT :- Circuit matrix, Fundamental circuit matrix and cut set matrix, Relation ship of these matrices]

Rank of the adjacency matrix.

UNIT 3:

Mapping and Conformal mapping:

Elementary functions, mapping by elementary functions, Mobious mapping, linear function, Bilinear mapping w=(az+b)/(cz+d), $w = z^2$, w = 1/z, w = exp(z),

[OMIT: $w = \sin z$, $w = \cos z$, $w = \cosh z$, $w = \sinh z$]

Transformations, Conformal mappings and their examples.

UNIT 4:

Power series:

Definition of complex sequence, Complex series and power series Expansion of a complex function in Taylor's series and Laurent's series.

UNIT 5:

Residues and poles:

Definition of a singular point, Isolated singular points, Zeros of complex functions, Poles and residues of complex function, Cauchy's residue's theorem, Evaluation of improper real integrals by residue theorem and evolution of definite integral of trigonometric functions by residue theorem.

Text book for Mathematics PAPER - 08 (Unit 1 & 2) Graph theory

Graph theory with application to engineering and computer science By: - Narsingh Deo, Prentice Hall of India Private Limited, New Delhi.

B.Sc. Semester 6

MATHEMATICS Paper No. 09 (A) MATHEMATICAL ANALYSIS - II and ABSTRACT ALGEBRA - II

OBJECTIVES

Students will

- have knowledge of Compactness in Metric Space
- have knowledge of Laplace Transforms and its application to differential equations.
- have knowledge of First fundamental theorem of homomorphism of groups and Rings.
- solve problems based on the knowledge.

COURSE OUTCOMES:

- remember definitions and result of metric space.
- understand theorems of metric space.
- understand concept of Laplace transforms and application to differential equations.
- understand concept of First fundamental theorem of homomorphism of groups and Rings.
- remember definitions and results First fundamental theorem of homomorphism of groups and Rings.
- understand proof of theorems.
- solve problem of based on theorems.

B.Sc. Semester 6 MATHEMATICS Paper No. 09 (A) MATHEMATICAL ANALYSIS - II and ABSTRACT ALGEBRA - II *Effective from June – 2021*

UNIT 1: [14 Marks] **Compactness in Metric Spaces** Cover, Open cover, Finite sub cover, Compact set, Properties of compact sets Connected sets, Separated sets, Bolzano-Weirstrass theorem, Countable set. Homeomorphism of two metrics, Sequential compactness, totally bounded space. [14 Marks] **Laplace Transforms** Definition of Laplace Transforms, Laplace Transforms of elementary Function Inverse Laplace Transforms, Laplace Transforms of Derivative UNIT 3: [14 Marks] **Application of Laplace Transforms to Differential Equations.** Laplace Transforms of Integrals, Laplace Transforms Differentiation and integration of Laplace Transforms, Convolution theorem, Application to Differential Equations. [14 Marks] First fundamental theorem of homomorphism of groups and Rings Homomorphism of groups, Kernel of homomorphism, First fundamental theorem of homomorphism of groups. Ring and its properties, Subring, [OMIT:- Boolean ring, Euclidean ring] polynomial, Product, sum and division of polynomials. [14 Marks] **Polynomial Rings** Reducible and irreducible polynomials, Factorization of polynomials(unique Factorization theorem (without proof), [OMIT:- Eisenstein's criterion] Division algorithm theorem of polynomial G.C.D. of polynomials, Quaternion [OMIT:- Ring homomorphism, Euler and **Fermat's theorem**] Text book for Mathematics PAPER - 09 (A) **MATHEMATICAL ANALYSIS - II (Unit 2 and 3) For Laplace Transforms** 'Advanced Mathematics for Pharmacy'

By: - Dr. M. M. Patel, Atul Prakashan, Ahmedabad

Chapter: - 17 Laplace Transforms

§ 16.1 to 16.9, § 16.11, § 16.12 [OMIT :- § 16.10]

Text Book for MATHEMATICS PAPER 09 (A) "Abstract Algebra" By: Dr. I. H. Sheth, Prentice Hall Of India, New Delhi.

UNIT 4:

Field, Zero divisor, Integral domain, Characteristics of ring, Cancellation law, Ideals, Principal ideal, ,Polynomial ring, [OMIT:- Quotient ring. Maximal ideal] Polynomial, Degree of polynomial, Factor and remainder theorem of

UNIT 5:

UNIT 2:

Course of Mathematics PAPER – 09 (A) (Unit 4 & 5) are covered by following Chapters/ Sections of the above mentioned book Abstract Algebra

 Chapter 12:
 § 12.1, § 12.2, § 12.6

 Chapter 13:
 § 13.1, § 13.2, § 13.3, § 13.4

 Chapter 14:
 § 14.1, § 14.2, § 14.3, § 14.4

 Chapter 15:
 § 15.1, § 15.2, § 15.4
 [OMIT:- § 15.3]

 Chapter 18:
 § 18.1, § 18.2, § 18.3,
 § 18.4 [Omit: Theorem: 18.4.8

 i. e. unique Factorization theorem (without proof)],
 § 18.5[OMIT: - § 18.6 - Eisenstein's criterion]

 § 18.7.
 § 18.7.

B.Sc. Semester 6 MATHEMATICS Paper No. 10 (A) OPTIMIZATION and NUMERICAL ANALYSIS - II

OBJECTIVES

Students will

- have knowledge of Linear Programming Problems.
- have knowledge of Transportation and Assignment Problems.
- have knowledge of Central difference interpolation & interpolation with unequal intervals and solve problems based on the knowledge
- have knowledge of Numerical Differentiation & Integration and Numerical solution of ordinary differential equations.

COURSE OUTCOMES:

- solve Linear Programming Problems.
- solve Transportation Problems.
- solve Assignment Problems.
- derive formula of Central difference interpolation & interpolation with unequal intervals.
- integrate and differentiate using numerical methods.
- solve ordinary differential equations using numerical methods.

B.Sc. Semester 6 MATHEMATICS Paper No. 10 (A) OPTIMIZATION and NUMERICAL ANALYSIS - II Effective from June – 2021

UNIT 1:

Linear Programming Problems

The linear programming problems, Formulation of LPP, Matrix form of the LPP. general form, Canonical form, Standard form of the LPP, Graphical method to solve LPP, Some definitions and basic properties of convex sets convex functions and concave function. Basic definitions to use Simplex method, Simplex method, Big-M method (Penalty method), Two phase method to solve LPP(without alternative solution and unbounded solution)

UNIT 2:

Transportation and Assignment Problems

Principle of duality in LPP, Primal LPP and method to find its dual LPP (Simple problems of above articles). The transportation problems: Mathematical and matrix form of TP. Initial solution of TP by NWCM, LCM and VAM, Optimum solution of TP by Modi method (u-v method) (except degenerate solution), Balanced and unbalanced TP(Simple problem), Assignment problem: Mathematical and matrix form of AP, Hungarian method to solve method(simple method).

UNIT 3:

[14 Marks]

[14 Marks]

[14 Marks]

Central difference interpolation & interpolation with unequal intervals: Gauss's forward, Gauss's backward, Sterling's, Bessel's and Laplace- Everett's interpolation formulae.

Divided differences, Properties of divided difference, Relation between divided differences and forward difference, Newton's divided difference formula, Lagrange's interpolation formula, Inverse interpolation, Lagrange's inverse interpolation formula,

UNIT 4:

Numerical Differentiation & Integration::

Numerical Differentiation, Derivatives using Gregory-Newton's forward difference formula, Derivatives using Gregory-Newton's backward difference formula, Derivative using Sterling's formula. Numerical Integration, General quadrature formula, Trapezoidal rule, Simpson 's 1/3 rule, Simpson's 3/8 rule.

UNIT 5:

Numerical solution of ordinary differential equations

Solution by Taylor's series method, Taylor's series method for simultaneous first order differential equations, Picard's method, Picard's method for simultaneous first order differential equations, Euler's method, Improved Euler's method, Modified Euler's method.

Runge's method, Runge-Kutta methods, Higher order Runge-Kutta methods, Runge-Kutta methods for simultaneous first order differential equations, R-K methods for simultaneous first order differential equations, Predictor-Connector methods, Milne's method.

[14 Marks]

[14 Marks]

Text Book for Mathematics PAPER - 10 (A) (Theory) OPTIMIZATION (Unit - 1 & 2)

Operation Research Theory and Applications', J. K. Sharma, Second Edition, MACMILLAN INDIA LTD

Course of Mathematics PAPER – 10 (A) <u>OPTIMIZATION</u> is covered by following Chapters/ Sections of the above mentioned book

Chapter 2:-• § 2.6 [Only] Chapter 3:-• § 3.1, § 3.2, § 3.3 [Omit:- § 3.4] Chapter 4 • § 4.1, § 4.2, § 4.3, § 4.4 [Omit:- § 4.5 and § 4.6] Chapter 5 • § 5.1, § 5.2, § 5.3 [Omit:- § 5.4, § 5.5] Chapter 9 • § 9.1 to § 9.5 § 9.6 • [Only § 9.6.1 Unbalanced Supply and Demand] • [Omit: - § 9.6.2, § 9.6.3, § 9.6.4... etc in § 9.6] • [Omit: - § 9.7, § 9.8] **<u>Chapter 10</u>** § 10.1 to § 10.3 • Appendix A A.10 and A.12

- [Omit: § 10.4 to § 10.6]
- [Omit: the rest]

The scope of the syllabus of UNIT - 3, 4 & 5 is roughly indicated as under:

"Numerical methods" by Dr. V. . Vedamurthy & Dr. N. Ch. S. N. Iyengar, Vikas Publishing house.

Chap.7 (Except 7.7,7.8), Chap. 8. (Except 8.8), Chap. 9. (Except 9.5, 9.13), Chap. 11. (Except 11.1, 11.2,11.3, 11.6, 11.9, 11.17, 11.20)

Reference Books:

(1) Introduction to Numerical Analysis (2nd Edition) by C.E.Froberg Addision Wasley, 1979

(2) Numerical Mathematical Analysis, by J. B.Scarforough, Oxford & IBH Publi.Co. Pvt. Ltd., 1966

(3) Numerical method, Problems & Solutions, by M. K. Jain, S. R. K.Iyengar, R. K. Jain, New Age International Pvt. Ltd., 1996.

B.Sc. Semester 6 MATHEMATICS Paper No. 08 (B) PRACTICAL: Introduction to GeoGebra

OBJECTIVES

Students will

- acquire knowledge about mathematical software GeoGebra.
- understand commands and tools of the software.
- use the commands and tools of the software.

COURSE OUTCOMES:

- understand interface of GeoGebra.
- Use of tool bars to draw various Geometric Shapes including lines, line
- segments, triangles, polygons, circles and conics.
- draw graphs of any function of one variable for Cartesian equation using menu bar and to analyze the function using function inspector tool from tool menu and find its properties like maximum and minimum values.
- draw graphs of curves using menu bar, when equation of the curves are given.
- draw various types of triangles including equilateral triangles, isosceles triangles, right angle triangles, acute triangle, obtuse triangle, and finding its various important centers including centroid, in-center, circum --enter and ortho-center.
- understand various circles and compass tools and practice of drawing construction of various geometric shapes including triangles, polygons, squares, rectangle ..etc.
- verify important theorems of geometry, algebra and calculus using GeoGebra.
- draw and measure various geometric shape using angle, distance, area and slop tools from tool bar.
- understand reflect, rotate and translate by a vector tools.
- understand the usage of slider and basic animation.

B.Sc. Semester 6 MATHEMATICS Paper No. 08 (B) PRACTICAL: Introduction to GeoGebra Effective from June – 2021

- 1) Introduction to the interface of GeoGebra.
- 2) Use of tool bars to draw various Geometric Shapes including lines, line segments, triangles, polygons, circles and conics.
- 3) Drawing of graphs of any function of one variable for Cartesian equation using menu bar and to analyze the function using function inspector tool from tool menu and find its properties like maximum and minimum values.
- 4) Drawing of graph of curves using menu bar, when equation of the curves are given.
- 5) Drawing of various types of triangles including equilateral triangles, isosceles triangles, right angle triangles, acute triangle, obtuse triangle, and finding its various important centers including centroid, in-center, circum -- enter and ortho-center.
- 6) Introduction of various circle and compass tools and practice of drawing construction of various geometric shapes including triangles, polygons, squares, rectangle ..etc.
- 7) Verification of important theorems of geometry, algebra and calculus using GeoGebra.
- 8) Drawing and measuring various geometric shape using angle, distance, area and slop tools from tool bar.
- 9) Introduction and usage of reflect, rotate and translate by a vector tools.
- 10) Introduction to the usage of slider and basic animation.

Notes :

- There shall be **SIX** periods of **1 hour** per week per batch of **15** students.
- 10 practical should be done during semester-6.
- At the time of examination candidate must bring his/her own practical journal duly certified and signed by **H.O.D.**
- There shall be one question paper of **35 Marks** and **3 Hours** for practical examination
- There shall be **15 marks** for Internal Practical Examination (i.e. Continuous internal assessment of performance of each student during the practical work.)

Format of Ouestion Paper for Practical Examination

	TOTAL	[50 Marks
Question 3:	Internal Practical Examination	[15 Marks
Question 2	Journal and Viva:	[8 Marks
Question 1	Answer any THREE out of FIVE	[9+9+9=	27 Marks

B.Sc. Semester 6 MATHEMATICS Paper No. 09 (B) PRACTICAL: Numerical Analysis-2

OBJECTIVES

Students will

• use theoretical concept to solve given problems,.

COURSE OUTCOMES:

- solve given problems using Gauss forward interpolation formula.
- solve given problems using Gauss backward interpolation formula.
- solve given problems using Sterling's or Bessel's formula.
- solve given problems using Laplace-Everett's formula.
- solve given problems using Interpolation with unequal intervals.
- solve given problems using Numerical differentiation.
- solve given problems using Numerical integration.
- solve given problems using Taylor's or Picard's.
- solve given problems using Euler's method.
- solve given problems using Runge's method.
- solve given problems using Runge-Kutta's method.
- solve given problems using Milne's method.

B.Sc. Semester 6 MATHEMATICS Paper No. 09 (B) PRACTICAL: Numerical Analysis-II Effective from June – 2021

- 1) Gauss forward interpolation formula.
- 2) Gauss backward interpolation formula.
- 3) Sterling's or Bessel's formula
- 4) Laplace-Everett's formula
- 5) Interpolation with unequal intervals.
- 6) Numerical differentiation.
- 7) Numerical integration.
- 8) Taylor's or Picard's
- 9) Euler's method.
- 10) Runge's method
- 11) Runge-Kutta's method
- 12) Milne's method

Notes :

Journal and viva.

- There shall be **SIX** periods of **1 hour** per week per batch of **15** students.
- 10 practical should be done during semester-6.
- At the time of examination candidate must bring his/her own practical journal duly certified and signed by **H.O.D.**
- There shall be one question paper of **35 Marks** and **3 Hours** for practical examination
- There shall be **15 marks** for Internal Practical Examination

(i.e. Continuous internal assessment of performance of each student during the practical work.)

Format of Ouestion Paper for Practical Examination

	TOTAL	[50 Marks
Question 3:	Internal Practical Examination	[15 Marks
Question 2	Journal and Viva:	[8 Marks
Question 1	Answer any THREE out of FIVE	[9+9+9=	27 Marks

B.Sc. Semester 6 MATHEMATICS Paper No. 10 (B) PRACTICAL: OPTIMIZATION

OBJECTIVES

Students will

• use theoretical concept to solve given problems of optimization.

COURSE OUTCOMES:

- solve the given LPP using Graphical method.
- solve the given LPP using Simplex method.
- solve the given LPP using BIG -M method.
- solve the given LPP using TWO-PHASE method.
- obtain DUAL of the given Primal LPP.
- find the initial solution of given transportation problem using NWCM method.
- find the optimum solution of given transportation problem using LCM method.
- find the optimum solution of given transportation problem using VAM method.
- find the optimum solution of given transportation problem using MODI method.
- find the optimum solution of given assignment problem.

B.Sc. Semester 6 MATHEMATICS Paper No. 10 (B) PRACTICAL: OPTIMIZATION Effective from June – 2021

-) Solve the given LPP using Graphical method.
- 2) Solve the given LPP using Simplex method.
- 3) Solve the given LPP using BIG -M method.
- 4) Solve the given LPP using TWO-PHASE method.
- 5) Obtain DUAL of the given Primal LPP;
- 6) Find the initial solution of given transportation problem using NWCM method.
- 7) Find the optimum solution of given transportation problem using LCM method.
- 8) Find the optimum solution of given transportation problem using VAM method.
- 9) Find the optimum solution of given transportation problem using MODI method.
- 10) Find the optimum solution of given assignment problem.

Journal and viva.
